Faculty Profile: Dr. Ekta Belwal is an academician and researcher working in the areas of Food Science and Technology, Food & Nutrition, Public Health Nutrition, Food Processing, Post-Harvest Management, and Sustainable Food Systems. Her research focuses on traditional and value-added foods, functional foods, food processing and preservation, food waste valorization, and sustainable livelihoods in the Himalayan region. She is actively involved in teaching, research, student mentoring, curriculum development, and extension activities, with a particular focus on the sustainable utilization of local fruits and food resources, sustainable food processing and circular bioeconomy approaches and livelihood development in Uttarakhand. She has qualified UGC-NET-JRF, ICAR-JRF (AIR-2), and ICAR-NET, and received the Young Scientist Award (2020) from UCOST. She is also a Life Member of the Nutrition Society of India. Her research aims to integrate food science, nutrition, and sustainability to strengthen food and nutritional security and support sustainable development in the Himalayan region.
